DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 46 to 49, drawn to a semiconductor component, classified in class 257, subclass 685.
- II. Claims 26 to 45, drawn to a method for fabricating semiconductor components on a substrate, classified in class 438, subclass 15+.
- III. Claims 1 to 25, drawn to system for fabricating a semiconductor component, classified in class 365, subclass 129+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of venting the air thorough the vent during the injecting step, it can be performed before the injecting step.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship
